

ANNEX C

GEOGRAPHIC INTELLIGENCE ANNEX  
TO THE  
GLOBAL WAR PLAN FOR THE DD/I AREA

(Prepared by GPR)

I. General

- A. Purpose. To define GPR's mission of providing geographic intelligence, photo intelligence, and specialized cartographic, photo interpretation, map reference, and map procurement services in the event of global war.
- B. Assumptions. The assumptions of this Annex are the basic assumptions set forth in the Global War Plan for the DD/I Area with the following addition:
1. That coordinated procurement of captured maps, charts, and related documents in response to intelligence needs at headquarters will, in wartime, be a CIA responsibility.

II. Wartime Mission

The AD/RR in the field of geographic intelligence and related specialized services will:

- A. Provide geographic intelligence support and specialized services required:
1. By (a) the DD/I (and through him by the NSC) and the DCI, (b) the IAC and supporting staffs and committees, (c) the Current Intelligence Center, and (d) other intelligence production components of the CIA in support of national policy determination and strategic war planning.

[Involving probable emphasis on regional analyses contributing to broad aspects of strategic planning, geographical contributions to the analysis of critical areas, preparation of strategic maps for use in planning and for inclusion in high level studies, and photo interpretation in support of the study of key problems of strategic significance.]

CIA Control No. 70947  
Final-A  
Copy No. 3 of 10.

2. For the DD/I and the DCI, the Current Intelligence Center, the appropriate components of the military services, and DD/P's field operations for tactical intelligence and target analysis.

- a. Provide detailed area analyses and targeting studies in support of 4th Force operations.
- b. Contribute to target analyses, as appropriate, undertaken by other components of the Agency, particularly in the economic field.
- c. Participate in the escape and evasion programs of the Armed Services by providing geographic intelligence on a coordinated basis.
- d. Provide photo interpretation support and photo intelligence studies to all CIA activities at headquarters as required.

[Involving probable emphasis, with expanded capabilities, on examination of areas having critical current intelligence significance, various types of target analyses in the military, economic, and scientific fields and to the conduct of exceptional operations.]

- e. Provide photo interpretation training to analysts and other intelligence officers as required.
  - f. Provide specialized assistance in the selection of map source material required for target analysis activities and other intelligence production undertaken by CIA and other government agencies.
  - g. Compile and construct maps and charts as required.
- B. Provide map intelligence support to the MIS Program and to the intelligence agencies
- C. At the direction of the DD/I, participate actively in any joint photo interpretation activity that may be established and be responsive to intelligence needs.
- D. Coordinate the map procurement efforts of the Government.

[Involving probable emphasis on the development of procedures for meeting the requirements of

CIA and the Services for captured maps and for most current map materials on areas that might be overrun by the enemy or might otherwise be critical to wartime operations.]

- E. Conduct field collection of maps in theaters of command and other critical areas in support of the intelligence needs of the various agencies at headquarters.
- F. Maintain an expanded cartographic service in support of CIA activity, the NSC, the President's World Situation Room, and other planning groups, as appropriate, and the M13 Program.
- G. Maintain a current collection of foreign maps, charts, and related documents on foreign areas, together with associated reference services.
- H. Undertake such other services of common concern as the DD/I may direct.

### III. Phases of Accomplishment

#### A. Pre M-Day

- 1. The production of geographic intelligence and the provision of specialized services in the field of cartography, photo interpretation, and map reference services, as well as the coordination of foreign map procurement will be continued without change under present directives.
- 2. Necessary agreements, with due regard to ASDIC and recognized relationships between CIA and the Armed Forces in theaters of war will be obtained to permit the establishment and operation of CIA map collection teams in theaters of command.
- 3. In case a joint photo interpretation effort to meet intelligence needs is established in the Z.I., appropriate participation for wartime operations will be formalized by agreement.
- 4. Personnel and equipment requirements in support of the War Plan provided by this Annex will be prepared and revised as necessary. (See ORR Mobilization Plan)
- 5. Training
  - a. Will undertake trial evacuations to emergency location to test (1) adequacy and balance of selected staff, (2) procedures, (3) effectiveness of support to other CIA and IAC

TOP SECRET

emergency elements during joint trials, and (4) adequacy of facilities and basic source materials for conducting emergency functions.

- b. Will conduct training in photo interpretation and in exploitation of special materials for analysts.
- c. Will increase readiness of selected personnel carried in reserve status by short term employment as consultants or by other means.

B. Initial Wartime Operation

- 1. If evacuation is necessary, deploy to relocation center, carrying out the planned initial and post D-Day wartime geographic intelligence mission within the limitations imposed by the emergency facilities and organization.
- 2. Contribute to evaluations of the current situation by providing geographic intelligence and specialized services.
- 3. Verify arrangements and agreements with other agencies for wartime operations and initiate action as required.

[Involving selection of personnel for possible participation in a joint photo interpretation center, verification of understandings regarding coordination of map procurement activities, and readying of map collection teams.]

- 4. Provide such other services of common concern as the DD/I may direct.
- 5. Implement the ORR Mobilization Plan by taking the necessary initial steps for converting of the military reservists, the phased calling in of CIA reserve personnel, obtaining the assignment of military personnel from the Services, and augmenting the civilian strength in terms of mobilization requirements. (See ORR Mobilization Plan)
- 6. Initiate training of augmented staffs for effective conduct of their duties.

C. Post D-Day Build-Up

- 1. Continue to contribute to evaluations and estimates on current situations.

CIA Control No. 70947  
Final-A  
Copy No. 3 of 10.

2. Implement as rapidly as possible all aspects of the War Plan for Geographic Intelligence.

[Involving probable emphasis initially on expanded geographic support of "spot" requests for area analysis, and an increase in requests for assistance from the map reference service; concurrently, rapid increase in requests for photo interpretation and cartographic services and geographic intelligence support to targeting, as well as adjustment to an accelerated escape and evasion program; and establishment of map collection teams in theaters of command.]

3. Continue build-up toward planned mobilization strength and re-evaluate personnel needs as functions and requirements become fully clarified.
4. Continue necessary training on an expanded scale.
